

Dr Debra Gook is Senior Research Fellow in Reproductive Services at the Royal Women's Hospital and Melbourne IVF, and holds an honorary position within the Department of Obstetrics and Gynaecology, University of Melbourne, Australia. For two decades, she has been at the forefront of research into the cryopreservation of the human female gamete and ovarian tissue. She has presented and published widely on freezing of both mature human oocytes and human ovarian tissue and continues to play a key role in the development of this technology for clinical application.
